

## 1.1 Belts conveyors

Motorized belts conveyor may have direct motorization (keyed on shaft) or return motorization means by sprocket and chain or pulleys and belts. May have various type of motorization: in terminal part, central part, arc solution ecc...

Belt conveyor can be unidirectional or bidirectional.

The mat can have high or low friction coefficient, can be cut-resistant and suitable for food industries.

The conveyors can have traditional pulley of driving and referral or end pen conveyors pulley  $\varnothing 20$  mm.

The machinery can be formed by painted steel, electro-zincify steel, stainless steel and aluminium.

### TECHNICAL DATES

**HANDLED PRODUCT TYPE:**

**HANDLED PRODUCT SIZE:**

**MAXIMUM SPEED:**

Cartons, bundles, thermoretractable materials.

Minimum 150mm x 100mm

Maximum 600mm x 800mm

Up to 90 mt/min
