

CONVEYOR LINES FOR CARTONS, BUNDLES, THERMORETRACTABLE MATERIALS

14.1 Palletising machines, depalletising machines

TECHNICAL DATES

Palletizers can be fed from below or above.

The palletizers from below, both single or dual input allow the automatic palletization in packs with transport power at low level.

The palletizer from above, both single or dual input allow the automatic palletization in packs with transport power at high level.

Dimension of pallet: the standard dimension pallets are 800x1200 - 1.000x1.200mm. But they can be customized according to customer requirements.

Production: these palletizers can palletize up to 22 layer and 65 ppm (these data will depend on the size of the product and the palletization scheme).
