

37.1 Liaisons among "twist" conveyor devices

Twist are conveyor link, made by rod stainless steel with different diameter. They can rotate product clockwise or counterclockwise of 90° or 180°.

Twist are not motorized because it works with the height difference of the twist.
The material can be covered to preserve product screen printing.

TECHNICAL DATES

HANDLED PRODUCT TYPE:

Barrels

HANDLED PRODUCT SIZE:

Up to 350 mm.

ROTATION TYPE:

Clockwise, counterclockwise 90°/180° or to slide.

MAXIMUM PRODUCTION:

Up to 20 cpm.
